Samreen Karim

Software Engineer

ABOUT ME

I am a recent graduate with a Bachelor's degree in Software Engineering, eager to apply knowledge of Web and Mobile Application Development. I have completed my Final Year Project that aims to address the problem of parking through a React Native application, using MongoDB as backend database and Figma for an application design and UI. I am actively searching for an organization where I can continue to grow and expand my skills.

WORK EXPERIENCE

December 2022 – February 2023.
Front & Backend Developer Intern (Remote) – BOT Solutions

- ✓ "**E-Installment Application**" - Responsive application in PHP with MySQL as a backend database.
- ✓ "**Customer-Developer Relation**" MERN stack application using MongoDB as the backend database and Express on the server.
- ✓ I learned to work in different frameworks, which allowed me to work in a team as well as helped me develop time management skills.

November 2022 – December 2022
Coffee Shop MERN Application

- ✓ Developed a responsive MERN stack application for coffee selling as a semester project.
- ✓ I learned to design responsive website using ReactJS, Express, and NodeJS.

September 2022 – October 2022
Flower Selling Responsive Website

- ✓ Developed a responsive website for flower selling shop as my semester project using pure HTML, CSS, JavaScript, and PHP
- ✓ I learned to design responsive website using HTML, CSS, JS, and PHP
- ✓ in a single website.
